Earth and Space Sciences: Geologist Questions for Understanding

1. What more would you like to learn about how geologists study Earth?

2. Think about what you read about geologists. Why do you think all geologists write reports about their work?

3. How could a geologist record what land looks like before a flood and after a flood?

4. What could you do to learn more about what geologists are studying where you live?

Supports and Develops:

Science and Engineering Practices: Asking Questions (for Science) and Defining Problems (for Engineering) (1); Planning and Carrying Out Investigations (3); Obtaining, Evaluating, and Communicating Information (8).

Performance Expectation 2-ESS1-1: Use information from several sources to provide evidence that Earth events can occur quickly or slowly.
